90 Madison Street, Suite 605
Worcester, MA 01608

RE: Baltic Mill
ESS Laboratory Work Order Number: 0905249

This signed Certificate of Analysis is our approved release of your analytical results. These results are only representative of sample aliquots received at the laboratory. ESS Laboratory expects its clients to follow all regulatory sampling guidelines. Beginning with this Project Narrative, the entire report has been paginated. The ESS Laboratory Certifications sheet is the final report page. This report should not be copied except in full without the approval of the laboratory. Samples will be disposed of thirty days after the final report has been mailed. If you have any questions or concerns, please feel free to call our Customer Service Department.

A handwritten signature in cursive script, appearing to read 'Laurel Stoddard'.

Laurel Stoddard
Laboratory Director

Analytical Summary

The project as described above has been analyzed in accordance with the ESS Quality Assurance Plan. This plan utilizes the following methodologies: US EPA SW-846, US EPA Methods for Chemical Analysis of Water and Wastes per 40 CFR Part 136, APHA Standard Methods for the Examination of Water and Wastewater, American Society for Testing and Materials (ASTM), and other recognized methodologies. The analyses with these noted observations are in conformance to the Quality Assurance Plan. In chromatographic analysis, manual integration may be used instead of automated integration because it produces more accurate results. All ICP Metals were analyzed using the established linear dynamic range to determine acceptable analytical results.

ESS Laboratory certifies that the test results meet the requirements of NELAC, except where noted within this project narrative.

To achieve Reasonable Confidence Protocols (RCP) compliance for Connecticut data, ESS laboratory has performed and reviewed all QA/QC Requirements and Performance Standards listed in each method. Holding times and preservation have also been reviewed. All RCP requirements have been achieved unless noted in the project narrative.

Question 5: Each method has been set-up in the laboratory to reach required RCP standards. The methods for aqueous VOA and Soil Methanol VOA have known limitations for certain analytes (ie for GWPC samples, 1,2-Dibromoethane regulatory levels will not be met by VOA 8260. If this is a contaminant of concern Method 8011 will need to be used.). The regulatory standards may not be achieved due to these limitations. In addition, for all methods, matrix interferences, dilutions, and %Solids may elevate method reporting limits above regulatory standards. ESS Laboratory can provide, upon request, a Data Checker (regulatory standard comparison spreadsheet) electronic deliverable which will highlight these exceedances.

Sample Receipt

The following sample(s) were received on May 19, 2009 for the analyses specified on the enclosed Chain of Custody Record.

Question 6: All samples for SVOA and Metals were analyzed for a subset of the required RCP list per the client's request.

| | | | |
|----|---|---|---|
| 1 | For each analytical method referenced in this laboratory report package, were all specified QA/QC performance criteria followed, including the requirement to explain any criteria failing outside of acceptable guidelines, as specified in the CT DEP method-specific Reasonable Confidence Protocol documents? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| 1A | Were the method specific preservation and holding time requirements met? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| 1B | <u>VPH and EPH Methods only:</u> Was the VPH or EPH method conducted without significant modifications (see Section 11.3 of respective RCP methods)? | <input type="radio"/> Yes | <input checked="" type="radio"/> N/A |
| 2 | Were all samples received by the laboratory in a condition consistent with that described on the associated chain-of-custody document(s)? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| 3 | Were samples received at an appropriate temperature (<6° C°)? | <input checked="" type="radio"/> Yes | <input type="radio"/> No N/A |
| 4 | Were all QA/QC performance criteria specified in the CT DEP Reasonable Confidence Protocol documents achieved? | <input type="radio"/> Yes | <input checked="" type="radio"/> No |
| 5 | a) Were reporting limits specified or referenced on the chain-of-custody? b) Were these reporting limits met? | <input checked="" type="radio"/> Yes <input type="radio"/> Yes | <input type="radio"/> No <input checked="" type="radio"/> No |
| 6 | For each analytical method referenced in this laboratory report package, were results reported for all constituents identified in the method-specific analyte lists presented in the Reasonable Confidence Protocol documents? | <input type="radio"/> Yes | <input checked="" type="radio"/> No |
| 7 | Are project-specific matrix spikes and laboratory duplicates included in this data set? | <input type="radio"/> Yes | <input checked="" type="radio"/> No |

Notes: For all questions to which the response was "No" (with the exception of question #7), additional information must be provided in an attached narrative. If the answer to question #1, #1A or #1B is "No", the data package does not meet the requirements for "Reasonable Confidence." This form may not be altered and all questions must be answered.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete.

Notes and Definitions

| | |
|-----|---|
| U | Analyte included in the analysis, but not detected |
| SC | Surrogate recovery(ies) outside of criteria. Reextraction/Reanalysis confirms results. |
| S- | Surrogate recovery(ies) below lower control limit. |
| M+ | Matrix Spike recovery is above upper control limit. |
| M- | Matrix Spike recovery is below lower control limit. |
| D+ | Relative percent difference for duplicate is outside of criteria. |
| D | Diluted. |
| B- | Blank Spike recovery is below lower control limit. |
| 4 | VOA sample could not be run by the low level method due to matrix interferences. |
| ND | Analyte NOT DETECTED above the detection limit |
| dry | Sample results reported on a dry weight basis |
| RPD | Relative Percent Difference |
| MDL | Method Detection Limit |
| MRL | Method Reporting Limit |
| I/V | Initial Volume |
| F/V | Final Volume |
| § | Subcontracted analysis; see attached report |
| 1 | Range result excludes concentrations of surrogates and/or internal standards eluting in that range. |
| 2 | Range result excludes concentrations of target analytes eluting in that range. |
| 3 | Range result excludes the concentration of the C9-C10 aromatic range. |
| Avg | Results reported as a mathematical average. |
